The global metal fabrication market is anticipated to expand at a CAGR of around 4% during the forecast period, 2020 – 2026. Increasing demand for metal processing and machining in the emerging economies is expected to drive the market growth.

Developing economies, such as India, China, and Indonesia, among others, along with industrialized countries, such as Japan and South Korea, have assisted the Asia-Pacific (APAC) region to dominate the manufacturing industry, in terms of demand, particularly with the demand for metal fabrication equipment.

India's rising demand for goods and services, combined with the fact that global manufacturing companies focus on diversifying their production by setting up low-cost plants in countries like India and China, has led to a rise in contract manufacturing.

Growth Drivers

- By 2024, the Asia-Pacific market is expected to register a compound annual growth **rate (CAGR) of 6.7%** in terms of value.
- Increasing demand for metal cutting equipment may lead to increased demand for metal fabrication equipment over the next few years.
- The Indian **Metal Treatment Chemical Market** is projected to reach **USD 378.4 million by 2023**
- India's Industrial **Laser Market** is likely to reach **INR 18.18 trillion** by 2026 at a **CAGR of 18.2%**
- India Industrial **Robotics Market** CAGR is expected show **13%** to reach nearly **US\$ 9.02 Bn.** by 2027
- The India **FABRICATION MARKET** is expected to grow at **5.5%** over the forecasted period 2022 - 2027. This is owing to factors such as increasing demand from the manufacturing sector and rising preference toward pre-engineered buildings and components. Government initiatives toward infrastructure development activities are also driving the market.
- The Indian manufacturing sector is expected to grow by more than six times its current value and reach a total of **USD 1 trillion** by 2025. This growth in the Indian manufacturing sector will increase the demand for more manufacturing facilities in India, which will lead to higher industrial growth in the market studied.
- The **PORTS SECTOR** has identified **US\$ 10 bn.** in potential investments, which will be awarded over the coming five years.
- In India, more than **US\$ 7.7 bn** worth of metro-line construction projects have begun.
- According to industry experts, growing demand in various sectors such as housing, commercial construction and industrial construction will increase cement production from **550-600 MTPA** in 2005 to **1,700 MTPA** by 2025.
- The Indian railway market is one of the fastest growing in the world. In the next five years, it will be the third largest in terms of revenue and 10% of global revenue.
